Bring the celestial charm of the Planets series into your home with Brokis' versatile mini lights

Innovative Design Studio (IDS), India's exclusive partner for the premium Czech lighting brand Brokis, is proud to introduce the Planets MINI collection, a refined extension of the acclaimed Planets family of lights.

SHARE

The Planets MINI collection brings the same elegant design language and functional versatility of the original Planets series in a more compact, adaptable form that suits residential and intimate spaces. Designed by the award-winning duo Vrtiška & Žák, these luminaires embody simplicity, flexibility and contemporary craftsmanship.

- Compact Elegance: A reduced scale allows installation in spaces with lower ceilings footprints while maintaining a strong design identity.

- **Flexible Arrangements:** The signature system of calibrated counterweights and pulleys enables effortless height adjustment and creative compositions, from a single pendant to multi-light installations.

- **Refined Craftsmanship:** Each pendant features a round LED panel beneath a matte glass diffuser that preserves a clean silhouette and delivers soft, ambient light.

- **Design Variations:** Available in three elementary geometric shapes – sphere, cone and capsule – with elegant finishes including smoky grey matte, triplex opal matte and smoke brown matte.
