IDS introduces Brokis' Planets MINI Collection

“Innovative Design Studio launches Brokis’ Planets MINI collection, a versatile and compact lighting series for contemporary interiors.”

Innovative Design Studio (IDS), exclusive Indian partner for the Czech luxury lighting brand Brokis, launches the Planets MINI collection, a sophisticated extension of the acclaimed Planets family of lights.

The Planets MINI collection, which is more compact and versatile and perfect for homes and small spaces, maintains the exquisite design language and practical utility of the original Planets series. Designed by Brokis & Žák, the award-winning duo, these luminaires personify clarity, versatility and modern artistry.

- Compact Elegance: A smaller scale preserves a strong design identity while enabling installation in areas with lower ceilings and footprints.

- **Flexible Arrangements:** Easy height adjustment and imaginative designs, from a single pendant to multiple installations, made possible by the distinctive system of calibrated counterweights and pulleys.
- **Refined Craftsmanship:** Each pendant has a spherical LED panel underneath a diffuser made of matte that creates gentle, ambient light while maintaining a clean form.
- **Design Variations:** Smoky grey matte, triplex opal matte, and smoke brown matte are among the excellent finishes available in three basic geometric shapes: sphere, cone, and capsule.

Ideal for contemporary Indian interiors, hospitality projects, and bespoke architectural spaces, this collection strikes a thoughtful balance between artistry and practical utility.
