“Innovative Design Studio launches Czech lighting house Brokis’ tailored solution for designing light for compact spaces through Planets MINI.”

Latest in the Planets family, Planets MINI is a collection that preserves the engineering sophistication of the original while adapting to the realities of standard interiors of lower ceilings, tighter volumes, and the bespoke proportions of bedrooms and dining rooms. The collection is an exclusive offering to designing compact spaces.

This new collection, conceived by the acclaimed Prague-based duo Vrtiška & Žák, is available in three elemental geometries—sphere, cone, and capsule. Each design is defined by consistent geometric clarity, establishing Brokis as a benchmark brand widely specified across hospitality, residential, and cultural projects globally.

The retention of the brand’s signature counterweight and pulley mechanism sets apart Planets MINI technically. This system, facilitating each pendant to be repositioned with a single hand, is an apt collection for hospitality settings, where lighting levels and compositions shift with use. The counterweights are

calibrated precisely to the mass of each individual fixture, ensuring that adjustments remain smooth and that every pendant holds position without drift. Clusters of up to twelve lights can be assembled into constellations that read as a unified composition from any angle.

Light diffusion is achieved through a circular LED panel discreetly concealed beneath a matte glass shade, producing a soft ambient glow that seamlessly merges with the glass surface. The design eliminates visible mechanical components and preserves a clean, uninterrupted silhouette. Matte metal fittings and monochromatic textile cables reinforce a restrained, cohesive aesthetic, making the piece suitable for contemporary, mid-century, and transitional interior environments.

Planets MINI is now exclusively available in India through Innovative Design Studio.
